

R. JASON KENT

— PHYSICAL THERAPY —

RJKPT is currently still providing care in both of our locations. To keep you, your family and our staff safe, we are working hard on continuous sanitization of the clinics and screening all patients and employees at the door prior to entering treatment areas, to provide the safest space possible for our patients and staff.

We are converting many of our patients in-clinic therapy treatment to Telehealth. We can alter your plan of care to allow you to attend physical therapy from your home. You will need an internet connections and a smart phone or computer with a webcam.

As a standard practice, we apply a disinfectant to all surfaces, which has demonstrated effectiveness against viruses similar to the Coronavirus. As always, we change all linens after each client.

During this current threat, we have increased our sanitizing efforts and are wiping all surfaces between clients including door knobs, chairs, counter tops, weights, and equipment. Feel free to review our hourly log in the clinic.

In Short,

- We have reduced the number of people in the clinic and we have spread out chairs and equipment.
- We are taking the temperature of every employee and patient at the door prior to entering the treatment areas
- Every person who enters our building is asked a list of screening questions in which we determine whether or not to let them in (based on their responses to the questions).
- We sanitize surfaces hourly
- We disinfect the tables and change all linens that have been contacted between each client
- We sanitize doorknobs, armchairs, equipment, weights, and any other surfaces that have been touched or used during a treatment
- We are requiring patients and staff to stay home if ill

- As always, we frequently wash our hands
- Many of our clinicians are wearing masks. If you prefer your therapist to wear a mask, just mention it and they are happy to do so!

RJKPT will be waiving all cancellation fees that are due to illness during the pandemic. Please call ahead of time to cancel.

PLEASE STAY HOME if home if you believe you have been exposed to the virus, even if you are not showing any symptoms.

Stay Informed:

The CDC has the most current information about the virus, including everything you need to know about how the virus spreads, how it's treated, how to protect yourself, and what to do if you get sick. Stay on top of the latest by visiting the [CDC website](#), which is being updated frequently.

Need therapy but afraid to leave home?

Try one visit of telehealth to see if it's for you!

Call us or request a visit on www.rjasonkentpt.com

Most Insurance plans are covering telehealth.
